

When your **TYPE 2 DIABETES** is out of **control**, finding *harmony* is essential.

If you're having trouble controlling your diabetes, consider participating in HARMONY, a research study evaluating an investigational diabetes medication that's taken **only once a week**.

Controlling your blood sugar levels can often become a challenge, even with medication, diet, and exercise. Additionally, the inconvenience of multiple daily doses required by other medications can disrupt your daily routine. Now, the HARMONY program is evaluating the effectiveness of an investigational type 2 diabetes medication, which could require less frequent dosings than currently available treatments.

To be eligible for this study, you must be:

- 18 years of age or older,
- diagnosed with type 2 diabetes, AND
- having trouble controlling your blood sugar levels.

Qualified participants will receive study treatment as well as study-related medical evaluations and tests at no cost.
