

CLINICAL TRIALS OF TEXAS, INC.

ARE YOU TAKING
325mg ASPIRIN PER DAY
TO **PREVENT** ANOTHER
HEART ATTACK
OR **STROKE?**

If so, you may be at a greater risk for developing gastric ulcers.

Clinical Trials of Texas, Inc and Dr. Mario Garza of Gastroenterology Consultants of San Antonio, are currently conducting a research study for men and women, 18 years or older, who are taking 325mg aspirin per day to prevent another heart attack or stroke. The purpose of this study is to determine if an investigational medication will cause fewer gastric ulcers when taken versus 325mg aspirin. Qualified participants may receive study-related exams and lab tests at no charge. Compensation for your time and travel may be available.
